

# Culvert replacement at the Lyre Conservation Area

<b>Regional Priority</b>	LDC3.3: Implement plans and priorities to restore habitat		
<b>Approach</b>			
<b>Owner Organization</b>	North Olympic Land Trust		
<b>Other Organizations</b>	Clallam County, Lower Elwha Klallam Tribe, Makah Tribe, North Olympic Peninsula Lead Entity		
<b>Primary Contact</b>	Michele Canale (michele@northolympiclandtrust.org)		
<b>Stage</b>	Planning/Design	<b>Duration</b>	2021 - 2022
<b>Estimated Total Cost</b>	\$55,000.00	<b>Secured Funding</b>	\$0.00
<b>No Funding Identified</b>	\$55,000.00	<b>Targeted Funding</b>	\$0.00
<b>Activity Progress</b>	Off-Track		
<b>Activity Progress Barrier</b>	Inadequate resources: Funding not fully secured		
<b>2018 NTA ID</b>	2018-0495		
<b>Total Proposed NTA Cost</b>	\$55,000.00		

**Implement integrated strategies and policies to protect and restore ecologically important lands > Implement plans and priorities to restore habitat**

Our overall goal is to advance restoration at the Lyre Conservation Area by removing a fish-blocking culvert on a tributary to Nelson Creek, which is a tributary of the Lyre River, and restore fish passage, opening up over half a mile of habitat. Additionally, this project will stop the spread of noxious weeds through consultation with Clallam County's Noxious Weed Program, and removal by the Washington Conservation Corps. With any remaining funding, the goal is to educate the public on the area's environmental significance and why it was prioritized for conservation.

**Targeted Puget Sound Recovery Progress Measure**

*No Expected Accomplishments provided*

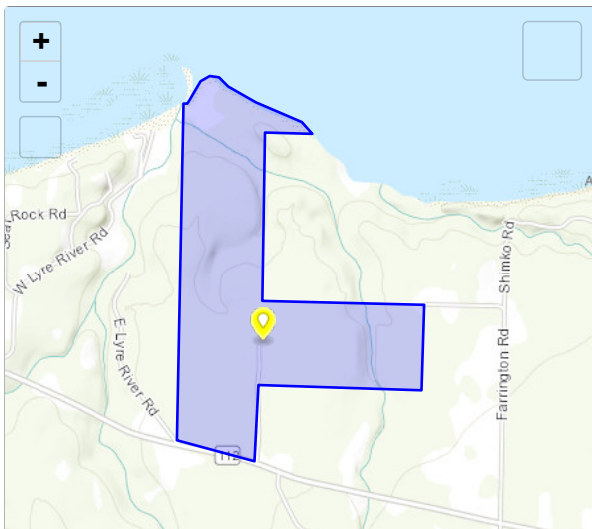

**Activity Types**

- Ecological Restoration - Ecosystem
