

Lyre River Watershed Protection and Restoration Phase II

Regional Priority	CHIN7.1: Protect and/or restore critical habitat for salmon populations.		
Approach			
Owner Organization	North Olympic Land Trust		
Other Organizations	Lower Elwha Klallam Tribe, Makah Tribe, North Olympic Peninsula Lead Entity		
Primary Contact	Michele Canale (michele@northolympiclandtrust.org)		
Stage	Planning/Design	Duration	2020 - 2022
Estimated Total Cost	\$700,000.00	Secured Funding	\$0.00
No Funding Identified	\$0.00	Targeted Funding	\$700,000.00
Activity Progress	Off-Track		
Activity Progress Barrier	Inadequate resources: Funding not fully secured		
2018 NTA ID	2018-0500		
Total Proposed NTA Cost	\$700,000.00		

Continue to restore degraded fish habitat, via projects in Lead Entities' four-year work plans ▶ Protect and/or restore critical habitat for salmon populations.

In 2014, Phase I was completed through acquisition of 280 acres, now known as the Lyre Conservation Area. That property was critical to anchor future efforts. In future phases, North Olympic Land Trust will conserve additional privately-owned parcels along the Lyre River, along Nelson Creek, and along the Strait of Juan de Fuca, through fee-simple acquisition or conservation easement, and pursue restoration including undoing the channelization of the lower river and adding large wood to further improve existing salmon habitat.
