

Snohomish River Estuary Derelict Vessel Removal

Regional Priority Approach	CHIN7.1: Protect and/or restore critical habitat for salmon populations.		
Owner Organization	Snohomish County Marine Resources Committee		
Other Organizations	Washington State Department of Natural Resources		
Primary Contact	Elisa Dawson (elisa.dawson@snoco.org)		
Stage	Planning/Design	Duration	2021 - 2022
Estimated Total Cost	\$450,000.00	Secured Funding	\$0.00
No Funding Identified	\$450,000.00	Targeted Funding	\$0.00
Activity Progress	Off-Track		
Activity Progress Barrier	Inadequate resources: Funding not fully secured		
2018 NTA ID	2018-0584		
Total Proposed NTA Cost	\$450,000.00		

Continue to restore degraded fish habitat, via projects in Lead Entities' four-year work plans → Protect and/or restore critical habitat for salmon populations.

This project provides support to the overall recovery of the Snohomish River Estuary, a critical habitat for salmon populations, by addressing and removing derelict vessels. Derelict vessels negatively affect salmon population by producing point sources of pollution; both toxics and nutrients. This project will also remove harmful structures from critical riparian habitat salmon population utilize on the Snohomish River. Snohomish County Marine Resources Committee (MRC) will work with Department of Natural Resources (DNR) under RCW 79.100 to prioritize and remove derelict vessels. This project addresses the Chinook Vital Sign 7.1.
