# Integrated Mapping and Decision Tools for Land Use Planning in Puget Sound

<b>Regional Priority</b>	LDC1.2: Gain understanding of the social, economic and political factors currently affecting habitat		
<b>Approach</b>	Washington State Department of Commerce		
<b>Owner Organization</b>	Washington State Department of Ecology		
<b>Funders</b>	Charlene Andrade (charlene.andrade@commerce.wa.gov)		
<b>Primary Contact</b>			
<b>Stage</b>	Planning/Design	<b>Duration</b>	2021 - 2024
<b>Estimated Total Cost</b>	\$1,928,600.00	<b>Secured Funding</b>	\$100,000.00
<b>No Funding Identified</b>	\$1,828,600.00	<b>Targeted Funding</b>	\$0.00
<b>Activity Progress</b>	On-Track		
<b>Activity Progress Barrier</b>	Inadequate resources: Funding not fully secured		
<b>2018 NTA ID</b>	2018-0735		
<b>Total Proposed NTA Cost</b>	\$1,928,600.00		

Enable protection and planning by addressing information needs for ecologically important areas ➤ Gain understanding of the social, economic and political factors currently affecting habitat

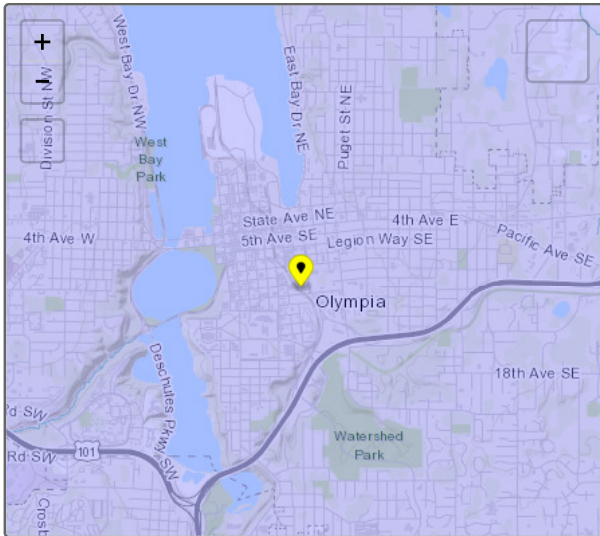

This NTA would develop a web-based portal with alternatives analysis tools to help local governments balance land planning and environmental goals under GMA. The web tool would integrate maps from local governments, agencies, and organizations, and would add tools to evaluate multiple scenarios and their effects on land use, critical areas, and regional Puget Sound targets (at multiple scales and across jurisdictions). We would build upon existing partnerships and collaborate with end users, Puget Sound Partnership, and resource agencies to provide an added-value, user-friendly, decision making tool for local planners.
