

Shellfish Growing Area Water Quality Improvement

Regional Priority Approach	SHELL1.11: Develop and implement local and tribal pollution identification and correction (PIC) programs		
Owner Organization	Washington State Department of Health		
Primary Contact	Scott Berbells (Scott.Berbells@DOH.WA.GOV)		
Stage	Planning/Design	Duration	2021 - 2023
Estimated Total Cost	\$600,000.00	Secured Funding	\$0.00
No Funding Identified	\$600,000.00	Targeted Funding	\$0.00
Activity Progress	Off-Track		
Activity Progress Barrier	Inadequate resources: Funding not fully secured		
2018 NTA ID	2018-0753		
Total Proposed NTA Cost	\$600,000.00		

Address overarching priorities to increase and protect harvestable shellfish acres ➤ Develop and implement local and tribal pollution identification and correction (PIC) programs

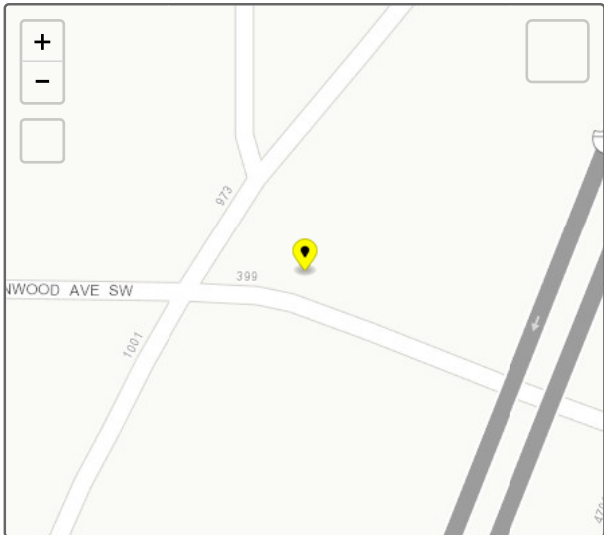

The Washington State Department of Health (DOH) will use their growing area classification information to evaluate current marine water quality information and potential pollution sources in the watersheds to create a prioritized list of impacted shellfish harvesting areas. DOH will work with state, local, and tribal partners to develop coordinated pollution identification and correction projects within these areas, where gaps exist. DOH will develop a solicitation for eligible state agencies, local agencies, and tribes to implement projects aimed at identifying and correcting pollution sources in the impacted areas.
